

## Specimen Flood Risk Indicator

This is an example of a Flood Risk Indicator of the title number set out below. This example is created purely for illustrative purposes only. For detailed information on each of the points below, please refer to the Flood Risk Indicator help pages.

Land Registry

in association with the

The Flood Risk Indicator is a textual result that will identify one of 3 scenarios for land registered under a title

- 1) The whole of the land under a registered title number falls within a floodplain.
- 2) The land under a registered title number is affected by a floodplain.
- 3) The whole of the land under a registered title falls outside of a floodplain.

You will also receive an indication of the likelihood of flooding where it is possible to do so.

### Flood Risk Indicator

The title number is Land Registry's unique reference number for this registered land.

Title number and property description  
CS72510  
23 Cottage lane, Kerwick, PL14 3JP.

When the property falls outside of a floodplain the result will indicate the proximity to the nearest floodplain for that land expressed in metres

Flood risk  
The land registered under the above title number falls within a floodplain.

When the land falls within a flood plain or partially within a floodplain the result will also show the likelihood of flooding for that land.

The land is in an area that has a low chance of flooding which means that it is unlikely to flood except in extreme conditions. The chance of flooding each year is 0.5 percent (1 in 200) or less. This takes into account the effect of any flood defences that may be in this area.

This uses information on the predicted likelihood of flooding from rivers or the sea for defined areas.

This result was produced on 4 August 2009 based on Environment Agency flood risk data that was current as of 1 June 2009 and Land Registry data that was current as of 4 August 2009. The flood risk indicator is based on the most up to date Environment Agency flood data available at the date and time of your search

## Disclaimer

The information contained in this document is for general information purposes only. The flood risk information is provided by the Environment Agency. You should note that:-

The Flood Risk Indicator shows only the predicted likelihood of flooding from rivers or the sea for defined areas. It is not detailed enough to account for precise properties.

Individual properties may not always face the same chance of flooding as the areas that surround them. There may also be particular occasions when flooding occurs and the observed pattern of flooding does not in reality match the predicted patterns shown on the Environment Agency flood data.

The Environment Agency do all they can to ensure that the flood data reflects all the data they possess and that they have applied their expert knowledge to create conclusions that are as reliable as possible. The flood data from the Environment Agency may by its nature not be as accurate as might be desired, might be misused or misunderstood. For the above reasons the flood data may not be accurate or completely up to date.

If you believe that a particular property does not face the chance of flooding shown on the Environment Agency flood data, or if you have information that you believe we may not have taken into account, then you should contact your local Environment Agency office or see the Environment Agency website for more information on flood data.

We will endeavour to keep the information up to date and correct but make no representations or warranties of any kind, express or implied, about the completeness, accuracy, reliability, suitability or availability with respect to the flood data. Any reliance you place on such information is therefore strictly at your own risk.

Further information concerning the risk of flooding in this area, incorporating flood defence data, is available on the Environment Agency website service.

See <http://www.environment-agency.gov.uk/subjects/flood>

## Specimen VAT Receipt

This is an example of a VAT receipt for the Flood Risk Indicator result. It will be automatically included in each result. This example is created purely for illustrative purposes only. For further information please refer to the Flood Risk Indicator Help pages.
